

Partner Support Programme

Fonterra and Crown World Mobility are committed to supporting accompanying partners on relocation, both personally and professionally. In our united approach we are pleased to offer a range of Partner Support programs to guide you towards a positive and enriching experience in your host location.

By offering a selection of programmes customised to address your specific goals and objectives you can accelerate your adjustment to your new city and build an independent life.

Here is a brief description of the support programmes available to you. During an initial discovery call we can work with you to decide the best fit option if you chose to take a programme. If these coaching programmes aren't for you, speak with your Mobility Consultant about the other support options available.

Settling In Support

The programme is designed to ensure the accompanying partner settles in their new environment as quickly as possible. Each programme is tailored to meet individual needs and the local community, and typically includes:

- Overview and introduction to leisure & hobby facilities
- Introduction to appropriate networking clubs & support groups
- Ongoing guidance and support with key concerns and queries

Partner Career Support Programme

For some Partners finding work in the host country is a necessity, but how to go about it? What if employment is not an option? Crown Consultants help Partners navigate the complexities of maintaining current professional skills and build new ones. Where employment is not an option, Consultants will guide the Partner

toward new personal goals. Customised programmes may include:

- Guidance on the creation of personal / professional networks
- Access to employment networks
- Coaching on resume writing and interview performance within the host country culture and norms
- Discussion on non-employment based opportunities to build a stimulating lifestyle such as starting a business, higher education, volunteering and personal interests.

Outplacement Support Programme

Some partners have a clear idea of the direction they want to take when it comes to employment in the host country and a more targeted programme, focussed around assistance with planning a job search campaign is ideal. Customised programmes may include:

- Access to employment networks and introductions to recruiters
- Guidance on the creation of personal / professional networks
- Coaching on resume writing and interview performance within the host country culture and norms.
